Subject: Supporting Richards Ranch — Keeping Families Together in Santa Maria
Date: Tuesday, May 6, 2025 12:23:21 PM

As someone who was born and raised in Santa Maria, I understand how challenging it can be for families to find affordable housing and remain close to the people and places they care about. I still have family in the area, and others who are hoping to move back. It's important to me — and to many others — that they have the opportunity to stay here without being pushed out by rising housing costs.

Projects like Richards Ranch make that possible. By creating thoughtfully planned homes, improving traffic flow, and supporting public services through tax revenue sharing, this project will help keep local families together and provide much-needed housing for working individuals and future generations.

Please consider the real impact this project can have on families like mine and the broader community. I respectfully ask for your support.

Thank you for your time and consideration.
